## Caractéristiques du produit

Bobine d'essuyage industriel: rechargement rapide et facile Idéale pour les environnements à forte fréquentation

Essuyage à sec des surfaces légèrement souillées Eliminent les éclaboussures de liquides, d'eau ou d'huile Pour les essuyages courants qui nécessitent résistance et absorption Longue durée

## Conditionnement

### Spécifications Unité Consommateur

Pcs/Con: 1

Poids brut/con: 3,057 kg

Poids net/con: 2,9563 kg

EAN Con: 7322540174045

### Spécifications Unité Transport

Emballage trp: Plastic

Con/Trp: 2

Longueur, trp: 260 mm

Largeur, trp: 520 mm

Hauteur, trp: 235 mm

Volume, trp: 0,03177 m<sup>3</sup>

Poids brut, trp: 6,114 kg

Poids net /trp: 5,9126 kg

Ean trp: 7310791188782

Pcs Trp: 2

Trp Palette: 48

## **Environnement**

### **Contenu**

Recycled fibres  
Chemicals

### **Matériel**

Recycled fibres

Recycled fibres can be produced both from collected newsprint, magazines and office waste. The paper is washed with water and treated with chemicals under high temperature and then filtered.

Chemicals

Both functional and process chemicals are used. The main functional chemicals are wetstrength and drystrength agents, dyes and softeners.

The wetstrength agent is a polyamide (from polyamidine/epichlorhydrinepolymer) with a very high affinity to the fibre, which gives the product its high wetstrength.

Process chemicals are retention agents, creping agents, defoamers, coating agents, nutrients, pH-regulators, cleaning agents, releasing agents and flocculation agents.

No dyes are used.

### **Production**

This product is produced at Kostheim mill, Germany, and certified according to ISO 9001:2000, ISO 14001 and EMAS.

### **Destruction**

This product is mainly used for industrial processes and hence it will be contaminated with different substances. This will determine how the used product will be destroyed.

The product itself is suitable for incineration. Contact local authorities before destruction.
